

Wetland Hydrology Monitoring

TAMARACK REFERENCE WETLAND

Martin-Island-Linwood Regional Park, Linwood Township

Site Information

Monitored Since: 1999
Wetland Type: 6
Wetland Size: 1.9 acres (approx)
Isolated Basin?: Yes
Connected to a Ditch?: No

Soils at Well Location:

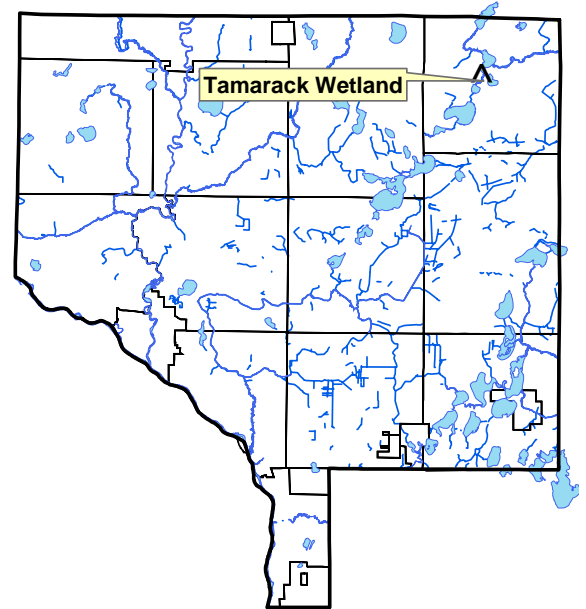

Horizon	Depth	Color	Texture	Redox
			Mucky Sandy	
A	0-6	N2/0	Loam	-
A2	6-21	10yr 2/1	Sandy Loam	-
AB	21-29	10yr3/2	Sandy Loam	-
Bg	29-40	2.5y5/3	Medium Sand	-

Surrounding Soils: Sartell fine sand

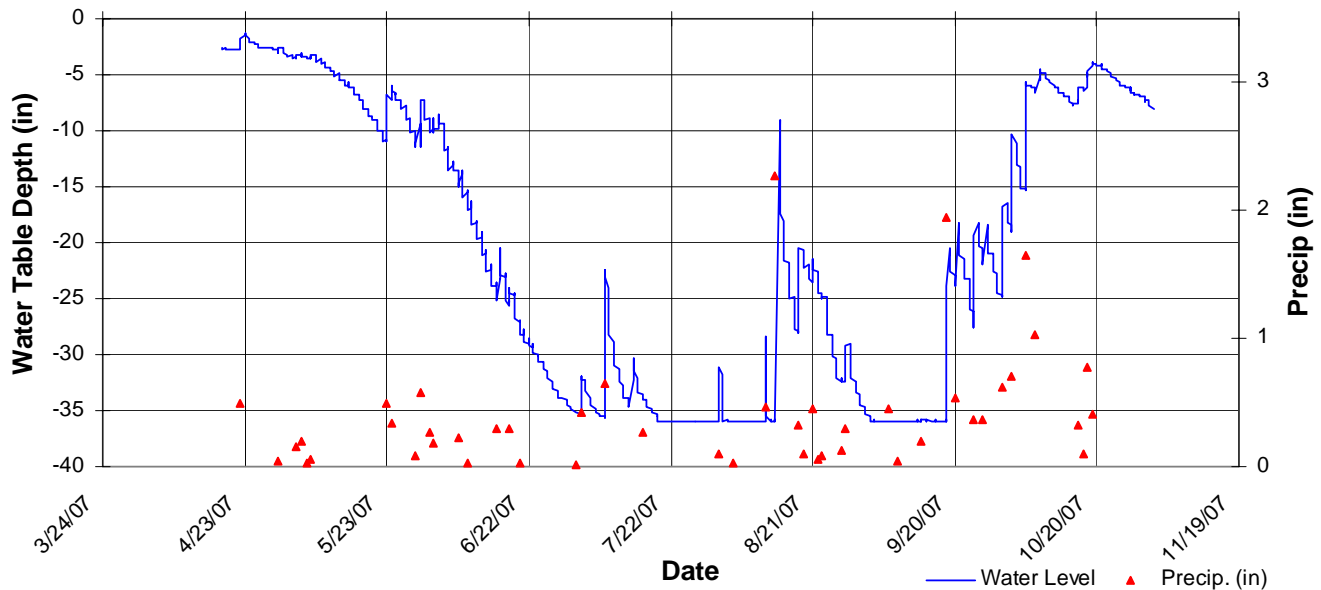

Vegetation at Well Location:

Scientific	Common	% Coverage
Rhamnus cathartica	Glossy Buckthorn	70
Betula alleghaniensis	Yellow Birch	40
Impatiens capensis	Spotte touch-me not	40
Phalaris arundinacea	Reed Canary	40

Other Notes: The site is owned and managed by Anoka County Parks.

2007 Hydrograph

Well depths were 36 inches, so a reading of -36 indicates water levels were at an unknown depth greater than or equal to 36 inches.
